

RADIODETECTION CLAMPS

RADIODETECTION LOCATOR CLAMP

FEATURES

- Used with a locator to help identify target utilities in congested areas by sensing the signals from individual utilities.

RADIODETECTION TRANSMITTER CLAMP MAC-10/TX-CLAMP-100

FEATURES

- Used to apply a transmitter signal to a specific cable or pipe. This is particularly useful where direct connection is not possible, or on live cables when these cannot be de-energized.
- It can be used with an extension rod.
